MAIN REQUIREMENTS FOR ECONOMIC OPERATORS

The regulation introduces editorial changes and revises the content of the currently applicable provisions of the Cabinet of Ministers regulation. The list of dairy products contained in Appendix 1 of the regulation has been adjusted; product characteristics have been amended and supplemented to reflect the current manufacturing technology and quality indicators of the respective dairy products.

To prevent consumers from being misled, the regulation clarifies the labelling requirements for composite dairy products or processed dairy products to which other foodstuffs or ingredients, whether piece-like or not, and a flavouring of another foodstuff have been added. In addition, the requirements for the labelling of cheese and other particular dairy products and processed dairy products have been laid down.
