

# Labor market middle and long term demand forecasting systems development

Published: 28.09.2020.

One of functions of Ministry of Economics is to develop labor market middle and long term forecasts. To develop the current forecasting system and improve the quality of forecasts, Ministry of Economics from 2010 until 2013 implemented Europe's Social Fund co-financed project "*Labor market demand middle term and long term forecasting systems development*" (Nr.1DP//1.3.1.7.0/10/IPIA/NVA/001).

Goal of the project - develop effective labor market demand forecasting system and improve forecasting methodology.

Project's main implementation directions - labor market middle and long term forecasting instrumentation perfection, as well as surveys and researches in labor market field.

Project's target group - public institutions, especially, education, employment and social inclusion politics developers and implementers. In a broad sense, target group includes social workers, current and potential job takers, as well as whole society.

Project's implementation period is from 03.08.2010 until 31.12.2013, and its total funding was LVL 236 451,17 (EUR 336 439,73).

Project's activities and results

Within the project five activities are realized:

[Surveys in labor market field](#)
