

LAMPS OF ULTRAVIOLET RADIATION DEVICES

SCOPE

Maximum efficient ultraviolet radiation level caused by the ultraviolet radiation device shall not exceed 0.3 W/m².

LATVIAN REGULATIONS

Cabinet Regulation No. 13, adopted January 15, 2019 "[Requirements for the Provision of Cosmetic Tanning Service](#)"

PRIOR AUTHORISATION

Goods are subject to requirements for use in ultraviolet radiation devices. Competent authority responsible for control of ultraviolet devices in use with lamps conforming to the requirements is Health Inspectorate (consumer helpline: +371 67081600, e-mail: vi@vi.gov.lv).

MAIN REQUIREMENTS FOR ECONOMIC OPERATORS

Maximum efficient ultraviolet radiation level caused by the ultraviolet radiation device shall not exceed 0.3 W/m².

Maximum efficient ultraviolet radiation level caused by the ultraviolet radiation device shall be confirmed by the technical documentation of the ultraviolet radiation device, declaration of conformity issued by the manufacturer of lamps or measurement results.

Measurements of radiation caused by the ultraviolet radiation device shall be performed with a calibrated measuring equipment which, according to the instructions for use of the manufacturer, shall be suitable for measuring the respective ultraviolet radiation by:

- a laboratory accredited in accordance with the laws and regulations governing the field of the assessment, accreditation, and supervision of conformity assessment bodies;

- a body accredited in other Member States of the European Union entitled to perform measurements of optical radiation;
- a person with qualification that is relevant for the performance of measurements.

The service provider (cosmetic tanning service) shall ensure the making of entries (in electronic or paper format) on change of the lamps of ultraviolet radiation devices, degree of wear thereof, and also any technical tests. These data shall be available to the consumers and Health Inspectorate upon request.
